

*A PPT Presentation of sister's
testimonies of their experiences of
Ecological Conversion.*

CHENNAI 2023

Angela

- **Being involved in the mission of hostel for girls, I encourage them to be conscious and care for the common home, BY ENCOURAGING THEM TO PLANT .They have planted 2 trees and look after them.**
- **Every now and then remind the girls to use water and electricity sparingly and not to waste food.**
- **Personally I am conscious of using water and electricity.**

Vimala

- I have practiced Eco-friendly nature in the following ways:

Green life: I have maintained my life by having thoughts that are giving life to my mind, thoughts like while admiring the green leaves in the tree Giving focused look on the green has made me to send positive energy to myself, my neighbor and surroundings.

- Encouraging the students:

I have taken steps to teach the students about the Eco-friendly concern in their own way.

Taught them about think green and clean.

- My practices:

Using minimum water and reusing the used water.

Avoiding use of plastic bags to the maximum level.

Separating the waste materials like composing and decomposing.

Using necessary things for daily living.

Usage of electricity to the needed time, remembering to switch off the fan and lights in the room and common place in the community

During my spare time I do gardening, watering plants and cultivate some vegetables. I use kitchen waste and dry leaves as compost. In doing this I feel relaxed, and able to forget my tensions.

**FRUITS OF MY LABOUR.....,
THANKING GOD OF CREATION.....**

Perpetua Machado:

- To reduce the waste that is disposed off in the environment, I encouraged students in my work situation ,to prepare WEALTH OUT OF WASTE.
- These are some of the beautiful items they prepared, which were displayed at an exhibition.

Ice cream spoons

Plastic bottles

Plastic Spoons

Sea Shells

Old CDs
